IV. SPECIAL FEATURES

Money Manager facilitates efficient asset management and accounting. It does not just record your money coming in and out of your account but deposits your money into your account as soon as your income is input and draws money from your account as soon as your expense is input.

Passcode:

You can check passcode so you can safely manage your financial review account book with Money Manager

Activity Flow or Work Flow:

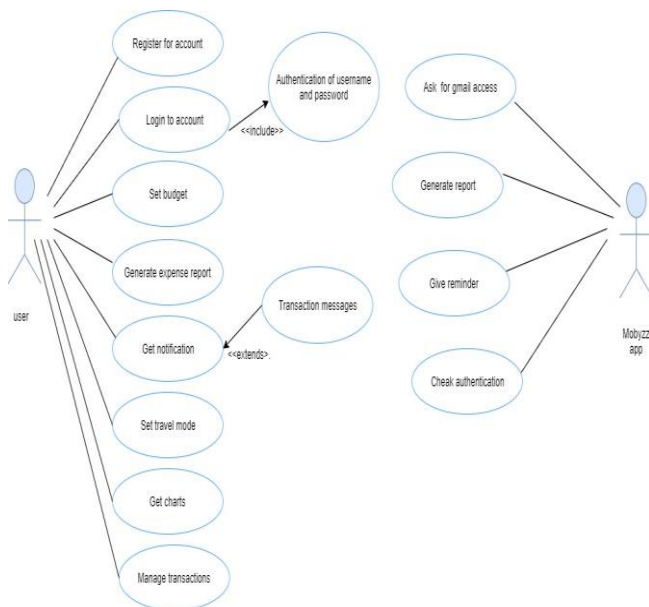

Transfer, direct debit and recurrence function:

Transfer between assets is possible, which makes your personal and business asset management more efficient. In addition, you can manage you salary, insurance, term deposit and loan more easily by setting automatic transfer and recurrence.

Instant statistics:

Based on the data entered, you can instantly see your expense by category and changes between each month. And you can see change of your assets and income/expense indicated by a graph as well

Our use case follow is:

Bookmark function:

You can easily input your frequent expenses all at once by bookmarking them.

Backup / Restore:

You can make and view backup files in Excel file and backup / restore is possible.

Other functions:

- Change of starting date
- Calculator function (Amount > upper right button)
- Sub Category ON-OFF function

Paid version:

- No ads.
- Unlimited Assets
- Edit PC

You can view “Money Manager” application using Wi-Fi. You can edit and sort the data by date, category or account group on the screen of your PC. In addition, you can see fluctuations of your accounts indicated on graphs on your PC.

V. FUTURE IMPLIMENTATION

This application for now work like users need to add all the details manually of their bills and all, but we planned that we will add a new feature by which user can just capture image and by some OCR (Object Character Recognition) we can grab details of spend money and save it into their profile with time so instantly and easily.

V. CONCLUSION

The simple interface helps you to manage your bills and budget on the go even offline, anywhere, anytime. You can add new transactions while you are drinking a coffee or taking an Uber. It’s simple to do and all your data will be instantly synced in the cloud. The budget planner and bill reminder that everyone needs on a daily basis.
