Abstract- *EATTING BUDDHA is an online food delivery portal and a revolutionary new online franchises guide, that makes it easy for customer to order food from different franchises in Ahmadabad and get it delivered at their home/work. EATTING BUDDHA provides a user friendly interface for its visitors which helps them in selecting to the best franchises according to their budgets, choice of cuisine, rating among other option. Already existed site is only contain the information about the hotel. But in this site contain the information and guidelines about the hotels and also customer can order the food and that hotel delivered that food to the customer .and user can also search for cuisine which are specialist of different food.*

Keywords- food,fast food,franchises,eating franchise Foodie franchises.

I. INTRODUCTION

EATTING BUDDHA is an online food delivery portal and new online franchises guide, that makes it easy for customer to order food from different franchises in some area and get it delivered at their home/work. EATTING BUDDHA provides a user friendly interface for its visitors which help them in selecting to the best franchises according to their budgets, choice of cuisine, and rating among other option.

EATTING BUDDHA provides an easy search for franchises by its location and cuisine (e.g. Chinese, Italian, and Indian, etc.) and it is browse through beautifully crafted collection to discover something special. EATTING BUDDHA explores every franchises around your location. It is shows the menus, pictures, and all the details of the registered franchises in the EATTING BUDDHA. It also shows the direction of the franchises and also shows the reviews of the customer to specified franchises and using that information customer can choose the best franchises from the all registered franchises. After choosing the franchises it provides the home

II. LITERATURE REVIEW

Smart Food Franchises is an foodie application by which user can fill their use best franchises searching. We made this application because there are many misunderstandings regarding the franchises.

Page | 538

Problems with the present food application are as follows.

- In Currant Food Ordering and Franchises guidelines site is very time consuming for finding the Franchises.
- After finding the Franchises they can' t clearly seen information about the particular Franchises like menu, photos etc.
- Some sites has so many images in the page then so much time is wastes to load the page on browser.
- Not good User interface.
- Many food ordering site can' t give ordered food on mentioned/particular time.
- Right now not a site is available in Ahmadabad which provide the Franchises guidelines and food ordering both functionalities in one.

III. WRITE DOWN YOUR STUDIES AND FINDINGS

Most of food ordering sites are so mach congested and don' t get correct information about the information which is searched by the specified user. They can' t provide the on time delivery and costumers disappointed by services of that particular site. So many sites don' t provide the live chat and customer get confused to ask any query about the site. So, overcome this all weakness of the sites we provide a new site with all this features include in that.

Current system involves wastage of time and energy because people are required to go there Franchises and order food and by using any particular site they can' t know/compare any other Franchises menu details and choose best on from other.customer.and user can also search for cuisine which are specialist of different food.

Franchises guidelines Management

Store an unlimited number of Franchises and provide all information about that particular Franchises.

The entire any franchises are dividing into location base, cuisine based, and rate based.

www.ijstart.com

Provide all Franchises menu details, features, facilities so user can choose best Franchises.

Order delivery management

Deferent user can order the food in the cart in many time and without any mistake.

And they deliver food on time.

User can Pre-order food they can order food and give time and place in advanced.

Discount offers Reports

Many Franchises provide the discount on their food items so all the discount offers are shown in the site.

Many foodie customers get their notification on their mobile and on e-mail.

To resolve the above problems and weakness of current system we require new system which resolves all above problems.

- Ease of searching.
- Timely updated.
- Significant consideration of feedback.
- Payment gateway is secure and easy.
- Communicate with admin.
- How our proposed system will cover

drawbacks of existing systems?

- Ease of searching.
- Timely updated.
- Significant consideration of feedback.
- Payment gateway is secure and easy.
- Communicate with admin.

ACKNOWLEDGMENT

Defeat is not when you fall down; it is when you refuse to get up. We faced many difficulties during our project to ensure, right from the requirement gathering to implementation. There were times when the goal looked beyond reach but all difficulties were accepted as challenge

Greater the challenges were the effort to overcome it. It has been rightly said that we are build on shoulders of others. For every things we have achieved the credit goes to all those who really helped us in completing this project successfully.

We would like to thank my Project Leader Prof. Ajaykumar T. Shah for providing a vision about the system. We

have been greatly benefited from their regular critical reviews and inspiration throughout my work

It is our earnest endeavour to express sincere thanks to the Internal Guide Prof. Ajaykumar T. Shah and faculty members for their kind co-operation, help and delighted support. Finally, we wish to thank our parents and friends who directly or indirectly helped us in completion of this project. I privileged to experience a sustained enthusiastic and involved interest from his side.

It was only due to their support, motivation and encouragement that could steer through the project on an honest course to splendour of success.

Thanks to All.
