Abstract- Nagapattinam is located in east coast of south India having nearly 70 industries in and around which is functioning from last 15-20 years the local peoples are working in various shifts. The key success of development of organization based on quality and dedication of staff and quality of work life .The owners and higher officials putting keen watching on the quality of life for employees of different organization around the globe .Quality of work life includes the amount of strong involvements of individuals. A comfortable component of the quality of life is the quality of life experienced by organization members at their work place. The value of work life is important and worthy of deep study of individuals and their satisfaction work at work place where they work. Thus the quality of life at work rolls over to the quality of work life experience in the family.

Keywords- Quality Work Life Cycle, co-relation, chi square test, significant level mean mode standarddeviation,

I. INTRODUCTION

Mostly by the survey of some organization it is found the employees at the grass root level experience a sense of frustration causes, such as - low level of wages, poor working conditions, unfavorable terms of employment, harassment by superiors, conditions of employment, interpersonal conflicts, role conflicts, job pressures, lack of freedom in work, absence of challenging work etc.

Years ago work was worship be the Moto of people they work with full sincerity and commitment to work. But now a days scenario is completely changed they are not believe on values of work. They work only for sack of monthly salary. But time to time the work norms have been changing in modern industrial society which indicates that"

- (i) Employee's role in industry is different from his role in the family
- (ii) Superior knows the best and he has the right to impose on the subordinates
- (iii) Rules are for employees and they have to follow them

(iv) Employer has the right to layoff the worker due to marketing and technological factors. Contemporary problems of managerial personnel: Due to these work norms, the managerial personnel at the middle and higher levels in the organization hierarchy face a variety of problems.

They are disappointed with the strict economic functions of the job and with the social relationships of organization by mechanization and automation of the industry. Further, indifference by others and less and less utilization of capabilities and skills also caused unfulfilled among the managerial personnel. The workers at the lower level are not happy with their work due to busy schedule of work, speed of machine, close watch and supervision and lacking of social life.

Concept of Quality of Work Life:

The concept of QWL is based on the assumption that a job is more than just a job. It is the center of a person's life and a worker has a whole individual rather than a half human and half machine personality of Jekyll Hyde type. depends on following;

Dimension of Quality of Work Life:

- 1. Principles of Quality of Work Life
- 2. Importance of Quality of Work Life.
- 3. Measure and Quality of Work Life.
- 4. Techniques For Improving Quality of Work Life.
- 5. Factors of Quality of Work Life.
- 6. Functions of Quality of Work Life.

1.2 Research Methodology: Research is a careful investigation of especially through search for new fact in any division of knowledge. Procedure is a methodically to solve the study problem. The various steps that are accepted by a study in key function of research methodology.

1.3 Research Design: The research design is the basic framework or a plan for a study to the collect data and applies appropriate data analysis method. Which is a pathway for both management and Employees satisfaction? The information are collected from the employees in industries of Nagapattinam District and analyzed with the help of statistical tools chi squre test and correlation method by describing the relationship between various input data variables, pertaining the job satisfaction and quality of work life. Moreover cross table analysis has been done for processing the data and information is derived to attain the objectives of the study.

1.4Method of Data Collection: Apply method to collect the primary data by Personal Interaction method and slandered Questionnaire method which contained mainly multiple choice questions. The respondent's opinions are collected regard to problem by the questionnaires.

1.5 Statistical Tools: The collected data is combined and tabulated and analyzed by using statistical tools like descriptive statistics and Chi- Square Test.

Period of the Study:

The study was conducted for a period for 3 months. The data collection by personal interaction by interview and quaternary in the industries during working hours.

1.6 Sample Size:

For study the sample size is 90 and questionnaire form is distributed to the various respondents for purpose of study was explain to the company. They have to tick mark in the boxes.

Statistical Analysis:

Tools-1Chi Square Test:A random sample of 90 employees in power soap limited and I have to find there is no difference between how is working environment

Null Hypothesis: H_0 : there is no significance difference between how is working environment and age of the respondents

Alternative Hypothesis H₁: there is no significance difference between how is working environment and age of the respondents

| Age / Environment | Strongly Agree | Agree | Disagree | Strongly Disagree | Total |
|-------------------|----------------|-------|----------|----------------------|-------|
| Strongly Agree | 6 | 5 | 5 | 9 | 25 |
| Agree | 4 | 2 | 0 | 8 | 14 |
| Disagree | 10 | 8 | 9 | 9 | 36 |
| Strongly Disagree | 5 | 5 | 1 | 4 | 15 |
| Total | 25 | 20 | 15 | 30 | 90 |

III. CALCULATION OF CHI SQUARE VALUE:

| S.No. | Observe Value(Oi) | Expected Value(Ei) | Σ=(Oi – Ei) ² /Ei |
|-------|-------------------|--------------------|------------------------------|
| | | | - (|
| 1. | 6 | 6.9 | 0.11 |
| 2. | 5 | 5.5 | 0.04 |
| 3. | 5 | 4.1 | 0.19 |
| 4. | 9 | 8.3 | 0.05 |
| 5. | 4 | 3.8 | 0.01 |
| 6. | 2 | 3.1 | 0.39 |
| 7. | 0 | 2.3 | 2.3 |
| 8. | 8 | 4.6 | 2.51 |
| 9. | 10 | 10 | 0 |
| 10. | 8 | 8 | 0 |
| 11. | 9 | 6 | 1.5 |
| 12. | 9 | 12 | 0.75 |
| 13. | 5 | 4.1 | 0.19 |
| 14. | 5 | 3.3 | 0.87 |
| 15. | 1 | 2.5 | 0.9 |
| 16. | 4 | 5 | 0.2 |
| 17. | | Total | 10.01 |

Statistical Analysis: Tools-2 Correlation:

A random sample of 90 employees in various industries of Nagapattinam District and I have to find there is no difference between work culture and performance.

Null Hypothesis H_0 : there is no significance difference between how is the work culture and performance

Alternative Hypothesis H₁: there is no significance difference between how is the work culture and performance Difference between my administrators cares about worker as person and how management resolves the problem

| Advance feature/ organization prepare Documentation | Strongly agree | agree | disagree | Strongly disagree | total |
|--|----------------|-------|----------|----------------------|-------|
| Strongly agree | 30 | 15 | 1 | 14 | 60 |
| Agree | 5 | 7 | 0 | 2 | 14 |
| Disagree | 0 | 0 | 1 | 0 | 1 |
| Strongly disagree | 5 | 7 | 3 | 0 | 15 |
| Total | 40 | 29 | 5 | 16 | 90 |

Correlation (r):

| x | Y | X2 | Y2 | XY |
|----|----|------|------|------|
| 35 | 60 | 1225 | 3600 | 2100 |
| 30 | 14 | 900 | 196 | 420 |
| 10 | 1 | 100 | 1 | 10 |
| 15 | 15 | 225 | 225 | 225 |
| 90 | 90 | 2450 | 4022 | 2755 |

Correlation (r)=0.87

IV. CONCLUSION

Since the calculated value lies between 0 and 1, so the x and y variables are positively correlated, the Ho is not accepted.Hence concluded there is no difference between my opinion and ideas seem to matter and the benefits offered here are fair and reasonable Table value= 26.296,Calculated value= 10.01at 5% significant level So the hypothesis is acceptable. Company / quality of work life portal shall be supplemental to collect internal knowledge and would regularly update the modern aids like e-publication, extranet, intranet. The effectiveness of the knowledge capture, strong, storing, sharing and application would be ensure by either a quality of work life unit or the managers and executives.

The research on quality of work life practiced in industries in Nagapattinam District to generate for indication on the methods of knowledge identification, storage, sharing, application and its benefits by probing various measurement of quality of work life. The research provided an opportunity to be aware of a practical exposure of quality of work life in the organization and to understand the stands of workers and employees. Finally quality of work life is measured for significant success of any organization. Three key reasons behind the successful fast growing industries as;

- 1. Facilitates decision- making capabilities
- 2. builds learning organizations by making learning routine.
- 3. Stimulates cultural change and innovation
