Abstract- Now a Days when students go to buy or sell their books to any place they have to face many problems like the place will be full of people and crowd they can't even communicate properly and sometimes there will be shortage of books and because of that they are not able to purchase that books. So we are creating this website to make the communication easy with students. They can buy any books or tools regarding engineering as well as they can sell them too. Our main motive is to satisfy the student's needs by allowing them to buy and sell their books or tools through this website. The website will be responsive so they can also use it by their mobile phones. The students have to register themselves by email id then the OTP will be received by them in the form of acknowledgement from the website. They have to enter that OTP and then they can use this website for their different purposes.

By using this website the efforts of the students will decrease.

Keywords- Book Selling, book buying, Book Searching.

I. INTRODUCTION

Presently, the students go to buy or sell their books to any place, they have to face many problems like the place will be full of people and crowd, they can't even communicate properly and sometimes there will be shortage of books and because of that they cannot purchase that books. So we are creating this website to make the communication easy with students. They can buy any books or tools regarding engineering as well as they can sell them too. Our main motive is to satisfy the student's needs by allowing them to buy and sell their books through this website. The website will be responsive so they can also use it by their mobile phones. By using this website the efforts of the students will decrease.

Our main purpose is to satisfy the student's needs by allowing them to buy and sell their books by using this website.

By using this website the efforts of the students will also get reduce.

The wastage of time will also get decrease.

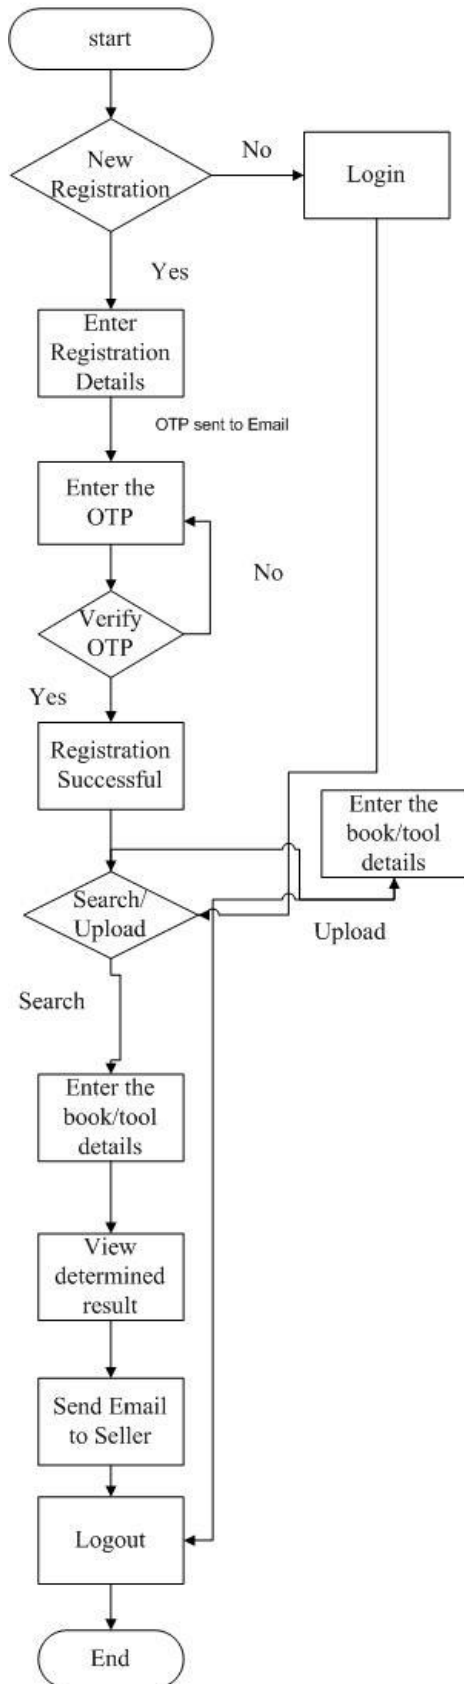

II. PROCESS

- To use this website the user has to register themselves by their email-id, after that one OTP will be received on their respective.
- After successful register user can search according to their needs.
- When the seller will upload the book, popup will generate to the respective of the buyer who is logged in.
- After finding the book/tool buyer will communicate with the seller and they will decide the further process for payment.
- This website is responsive so user can use it from anywhere using their mobile phones.
- Then the user will log out from the website.

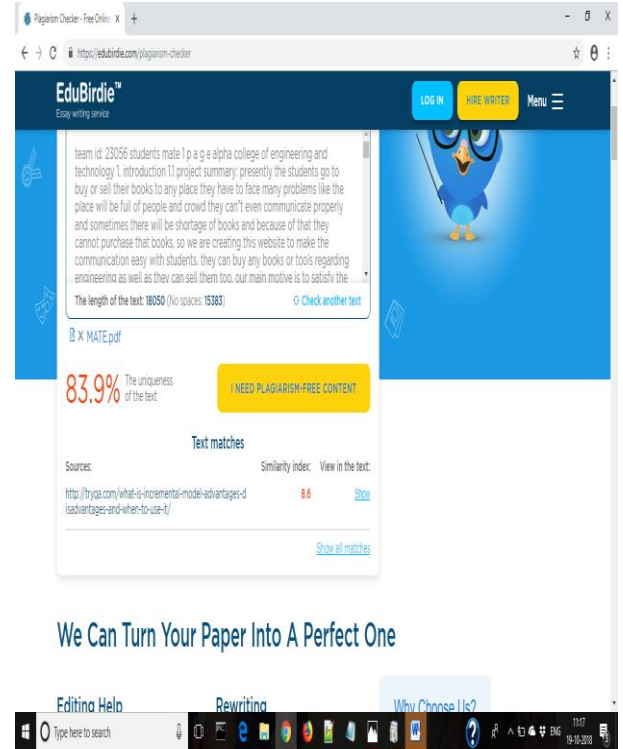

III. METHODOLOGY

- If the person is using this website for the first time then he/she needs to register themselves first. For Registration they need to enter their email id and password. After entering it they will get one OTP from the website. They have to enter that OTP number and registration will be successfully completed.
- If the person is a Buyer then he/she needs to search for that book/tool by entering its details. After that the buyer will get the result. She/he can choose the seller according to their needs. And one button will be there in seller's profile. "Send Email to Seller". The buyer needs to click on that button & then he/she can communicate with the seller.
- If the person is a Seller then he/she needs to upload the book/tool by entering its details. If any buyer is logged in the website. Then he/she will get one pop-up message.

Student's Mate

IV, RESULT

V. CONCLUSION

By creating this website we will make the communication easy for the students, it will also reduce the efforts of the students, students can easily search the books and tools and will be able to find them, any normal user can use this website, as the website is responsive the user can use it from anywhere.
