²HOD, Dept of Computer Engineering

^{1,2} Alpha College of Engineering and Technology

Abstract- A new place on the Internet where people share ideas and stories that are not just for friends. While it might look like a standard blogging platform, a content management system, it has been designed for little stories that make your day better and manifestos that change the world. And yet it helps you find the right audience for whatever you have to say. Sole purpose is to help to find compelling ideas, knowledge, and perspectives. Fall back in love with reading.

Keywords- PHP-my admin, Design with Codeigniter, Design with HTML, Bootstrap and CSS, MySQL, xampp server, Post, Stories, Articles , Authors Log In , Admin Log In.

I. INTRODUCTION

Abhivyakt is not like any other platform on the internet. Sole purpose is to help you find compelling ideas, knowledge, and perspectives. Fall back in love with reading. It is an ad-free digital publisher. No noisy news feeds, no distractions and distortions. Just the best deep thinking and new perspectives on topics you care about most. A new place on the Internet where people share ideas and stories that are not just for friends.

Authors can publish articles, posts and stories also. Visitors/users can read or watch it without login formalities. Admin has a control of authors and posts. Authors can follow each other. Also can like, comment and share their favorite posts.

II. LITERATUREREVIEW

- A. PHP is a web development platform, which provides server side scripting. PHP stands for Hypertext Pre-processor, that earlier stood for Personal Home Pages. PHP is used to develop Static or Dynamic websites or web applications. PHP is used to produce interactive, data-driven web applications over the internet. It consists of a large number of controls and libraries.
- B. MySQL is a relational database management system (RDBMS) that uses SQL. It is free and open source. The primary function of the SQL Server is to store and retrieve data used by other applications.

- C. CodeIgniter is a PHP MVC framework for developing applications rapidly. CodeIgniter provides out of the box libraries for connecting to the database and performing various operations. Like sending emails, uploading files, managing sessions, etc.

CodeIgniter is an MVC framework. MVC stands for Model View Controller. When a user requests a resource, the controller responds first. The controller understands the user request then request the necessary data if necessary.

III. STUDYFINDINGS

- The current system forces readers to pay after one or two read of articles. The paywall appears which stops readers to read. Not every user is convincible to pay for reading articles.
- Help out many features collaborative with in one type of the system included. So it can be helped out in new trends that many functions usable to in one web application in this new system. Different kind of modules and phases are usable in that known as a particular of the fields.
- Not necessary to login for reading. It provides user-admin communication. It provides highest access of data. It provides secure accessibility.it also provide flexibility of services. It also provides reliable images and give better performance.
- Every user should be comfortable for the working of the known as a basic computer and net browser. They must have basic knowledge of English Language. User can select the desired articles by selecting categories. User must have some knowledge of how to use any websites.
- Admin is an entity that will manage entire system. Admin have must authorized. Admin have all rights to performing any type of given rights to the given user because they will have highest level of access the rights. Admin have observation of some areas like database, security, integration and management.
- The minimum hardware requirement is Memory of 4 GB RAM or more, Monitor resolution of 1024*768 or highest access, Intel Pentium 4 or AMD Athlon 2 GHz (or more faster), 1 GB (or more) available hard disk space.

IV. FUTURE ENHANCEMENT

Best for the authors-readers. Abhivyaktis designed for reading and writing purpose. Sole purpose is to help to find compelling ideas, knowledge, and perspectives. Fall back in love with reading. In future this system might provide best of journalism and articles and more creative ideas to readers. .

V. CONCLUSION

This system helps to find compelling ideas, knowledge, and perspectives, it provides login to the authors which wants to publish. The system is user friendly and has convenient user interface. The reliability, robustness and correctness of the system exact need more elaborate study to help the admin. The helping out maintain their accounts, data, record seasily.

VI. ACKNOWLEDGMENT

We express our sincere thanks to Prof. Ajaykumar T. Shah Head of Department of Computer Engineering, Alpha College of Engineering and Technology for their Support and guidance for this project and care taken by them in helping us to complete the project work successfully.
