*The main purpose of this club website is the user can easily do member registration. It is a club management software system in the handy form of a website. Club would have its own website backed up by its own secure membership database.*
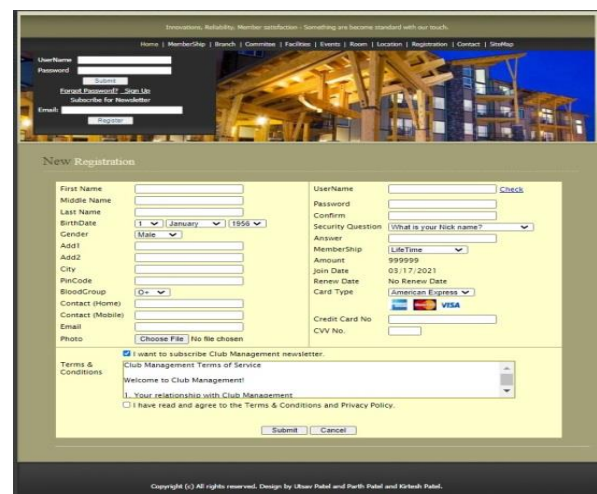

## I. INTRODUCTION

The main propose of this club website is the user can easily do member registration. This site includes member registration up to member socializing (blogging, chatting),news and activity, etc. it is a club management software system in the handy form of a website. Club would have its own website backed up by its own secure membership database. We'll host the clubhouse for people and it can be linked to their existing website or used by it own. Use the club management website to keep track of member, subscription, club event, enquiries, questionaires, email, bookings and perform general club management tasks.
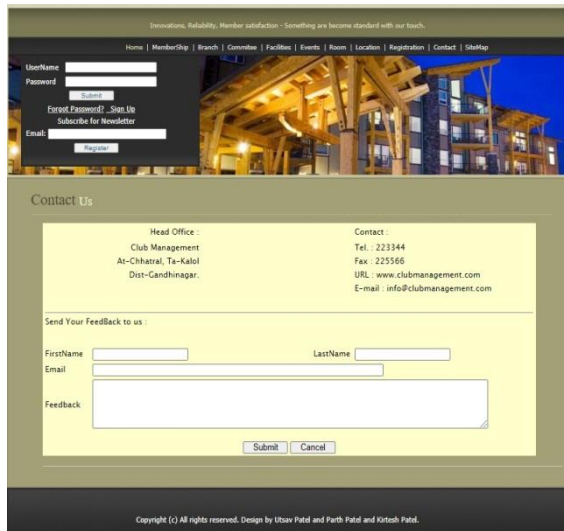

## II. LITERATURE REVIEW

A. SECURE WEBSITE COMPARE THAN OTHER: In our website we provide to organizing different type of events, activity and so many other types of facility. The main advantage of our website is highly secure compare to other.

B. GAPS: Other website data are easily access by anonyms but in our website highly secure with different security. Other website doesn't provide to online membership but our website do it.

C. Multi-tier club membership: The present technology-based invention integrates the internet online and the huge real-world, point of sale at in-store registers, offline, with a marketing and sales, method and system for consumer, national and international, retail and wholesale, product marketplaces discounting in the vast via product discount club memberships along with the discount club member cards.

### III. STUDY FINDINGS

A.  The club management that the members or become the member of club, want to know about membership they have to go to the club and aask about the membership and from out state or outside country they can't come to the club so they ask through the phone. Member want to live in the club so there is room in the club. So if the members want to know the room is available or not they have to go to the club or have to call for the room. Which is available or not.

B.  New system will be completely online web based system. So there is no limitation of price related issues. New system is also available on android website so that the user can easily operate these website. New system has best user interface and it is easily operate these system so that illiterate people can use it easily. Using new system we can solve the users for room booking and take membership problem.

C.  Using new system business would be take quick and accurate decision with the online and on time data report generation facilities will be available in this new system. Users can check membership and event price on website.

D.  Admin can manage all the system. Admin can add or remove the members and also he can update the membership and also he can update the membership prices. Admin can send the push notification to the members for updating membership prices.

E.  Customer feedback: User can also give feedback about service any transaction problem and any memberships problem.

F.  Payment can also done in online banking.

G.  The constaraints are the requirements of the system and the processes to finding out and also analyzing documenting and checking thses services and constraints.
