Abstract- Event management is the application of project management to the creation and development of large or small scale events such as festivals, conferences, ceremonies, formal parties, concerts, or conventions. Application will mainly focus on birthday party, marriage functions and social events. The application will be developed using Android studio and back end will be managed in SQL database. Application will have easy and feasible GUI for all type of users. The core phase of the application will display list of events based on the user profile details. This event will further contain description about event, its exact location, ticket rates , date and time. These details will be firstly verified by the administrator to fulfill the security protocols.

I. INTRODUCTION

Online Event management system is a website that enhanced project management to the creation and development of large-scale events such as festivals, conferences, ceremonies, weddings, formal parties, concerts, or conventions. It involved studying the brand, identifying its target audience, devising the event concept, and coordinating the technical aspects before actually launching the event. The Event management website enabled customers/ clients view various packages/products about the event and make booking through the online platform. The process of planning and coordinating the event is usually referred to as event planning and it included budgeting, scheduling, site selection, acquiring necessary permits, coordinating transportation and parking, arranging for speakers or entertainers, arranging decor, event security, catering, coordinating with third party vendors, and emergency plans. Each event was different in its nature so process of planning & execution of each event differed on basis of type of event.

II. IDENTIFY, RESEARCH AND COLLECT IDEA

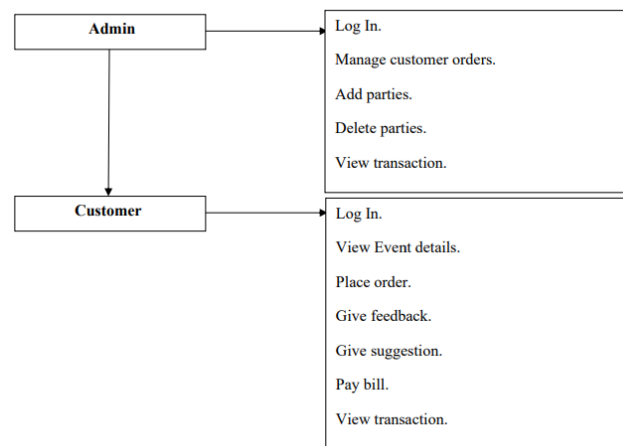

In the existing system customer contacts, the company for event management. He provides the details of the event and its requirements. He explains its aims, how long it will last, its format (Presentation/Workshop and/or Exhibition etc.), expected number of delegates/guests, equipment and furniture required, whether any delegate pack or promotional

material is to be distributed, and other facilities required. The other various event management website display the service they provide and take bookings .But in our website we will provide a service where he/she who is hosting the event can them self select each category like food, sound, decoration and etc. as per the budget and type of event they are planning.

In the existing system customer contacts, the company for event management. He provides the details of the event and its requirements. He explains its aims, how long it will last, its format (Presentation/Workshop and/or Exhibition etc.), expected number of delegates/guests, equipment and furniture required, whether any delegate pack or promotional material is to be distributed, and other facilities required. The other various event management website display the service they provide and take bookings .But in our website we will provide a service where he/she who is hosting the event can them self select each category like food,sound,decoration and etc. as per the budget and type of event they are planning.

III. METHODOLOGY

To overcome the problem faced in already online shopping site we implement the shopping site which solves the faced problems. In this website we design a different module which contains different privileges or permissions. The modules are as following block diagram.

IV. LITERATURE SURVEY

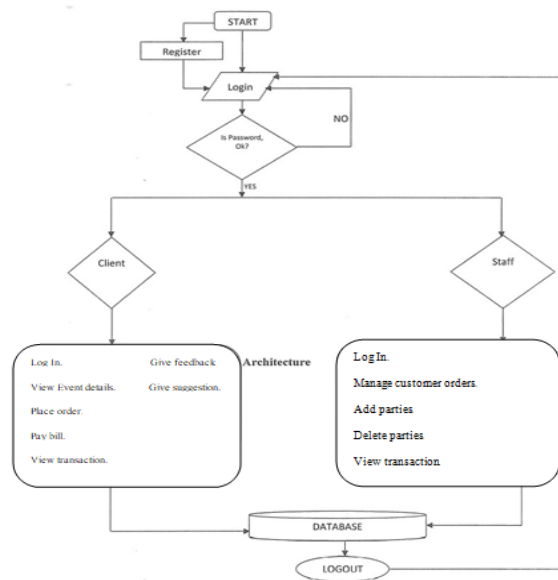

In the existing system customer contacts, the company for event management. He provides the details of the event and its requirements. He explains its aims, how long it will last, its format (Presentation/Workshop and/or Exhibition etc.), expected number of delegates/guests, equipment and furniture required, whether any delegate pack or promotional material is to be distributed, and other facilities required. The other various event management website display the service they provide and take bookings .But in our website we will provide a service where he/she who is hosting the event can themself select each category like food,sound,decoration and etc. as per the budget and type of event they are planning.

V. EXISTING SYSTEM

These days people need to go to actual event place for enquiry or get bookings, but now days we know the situation this situation is not well for our health.

The data in the office has to be maintained manually.

VI. STRUCTURE

Online Event management system is a website that enhanced project management to the creation and development of large-scale events such as festivals, conferences, ceremonies, weddings, formal parties, concerts, or conventions. It involved studying the brand, identifying its target audience, devising the event concept, and coordinating the technical aspects before actually launching the event. The Event management website enabled customers/ clients view

various packages/products about the event and make booking through the online platform. The process of planning and coordinating the event is usually referred to as event planning and it included budgeting, scheduling, site selection, acquiring necessary permits, coordinating transportation and parking, arranging for speakers or entertainers, arranging decor, event security, catering, coordinating with third party vendors, and emergency plans. Each event was different in its nature so process of planning & execution of each event differed on basis of type of event.

VII. ADVANTAGES

Online event management provides unique opportunities to generate first-party data through registrations and attend engagement in event and via website. Some event platforms provide granular insights on attendee engagement and satisfaction and allow the organizers to use this information to iterate and improve experiences.

VIII. DISADVANTAGES

Difficult to use who do not aware in technologies. It requires stable Internet Connection.

IX. CONCLUSION

In this paper I described how to book events on website, what is need of Event Management Website and what are the future scope for that.

AUTHORS PROFILE

Mrs. S. S. Bahirgunde
 She is completed B.E in Computer Engineering and M-Tech in Computer Science. She is work as Assistant Professor in Sharad Institute of Technology Polytechnic in Department of Information Technology

Mr. Ayush S. Yalrute
 He is studying in Sharad Institute of Technology Polytechnic in Department of Information Technology in Third Year diploma.

Mr. Abhishek K. Magdum
He is studying in Sharad Institute of
Technology Polytechnic in Department
of Information Technology in Third
Year diploma.

Mr. Varunraj A . Patil
He is studying in Sharad Institute of
Technology Polytechnic in Department
of Information Technology in Third
Year diploma
