Abstract- This web application provides facility to take care of your pets. The Pet daycare will be divided into four main parts i. e. Admin Panel ,Employee Panel ,Doctors, Users. Generally, when we go on a vacation or any business trips, we have to leave our pet to any relative or neighbours, which is not viable all the time So, we are planning to create a housing for those pets, providing them with professional care, and allow reservations or booking online. Our website will also be connected with the local pet stores to provide all kind of pet ration ,equipment and medicines online. We'll also connect our website with the pet doctors, to provide online appointments and emergency help for the pets.

Keywords- pet, daycare, service, donate, medical, equipment.

I. INTRODUCTION

Normally, As long back, People were not having pets too as the member of the family. As the years passes people found the significance of pets that pets are more worth enough for deep down happiness. But as this overwhelmed joy of having a pet at our place, create much more issue of giving them proper care and space at our locality. People used to have problem with the pets diet, housing ,medical treatment, sanitation issues etc. So, people used to search for the solution by means of transportation To and Fro. They used to find places here n there for keeping their pets at careful housing place where pets would get that same affection like the owner have when they want to go for vacation travel or business tour. They need to search for food, housing , medical facilities, sanitation etc, that would take much time of consumers, making them more stressful as by not having the perfect response from vendor and their respectives.This website is for pet day care as pets can be cared in more loving way in absence of the owner. IN this website user can view day care hours for pet, services, medical, donate, products for pet .It provides a platform which enables you to find information & communication of pet can be cared, how they are nourished, they are loved . Main objective of this website is to provide best care facilities for pets , good services, equipment , products and housing It will make easy for owners to take care of their pets and will rely on this website in long run.

II. LITERATUREREVIEW

- A. Alongside HTML and CSS, JavaScript is one of the core technologies of the World Wide Web. JavaScript enables interactive web pages and is an essential part of web applications. The vast majority of websites use it for client-side page behaviour, and all major web browsers have a dedicated JavaScript engine to execute it
- B. SQL Server is a relational database management system (RDBMS) developed and marketed by Microsoft. As a database server,the primary function of the SQL Server is to store and retrieve data used by other applications.
- C. A one-time password (OTP), also known as one-time pin or dynamic password, is a password that is valid for only one login session or transaction, on a computer system or other digital device..
- D. The Java Class Library is the standard library, developed to support application development in Java. It is controlled by Sun Microsystems in cooperation with other java community program.

III. STUDYFINDINGS

- A. Preliminary system study is the first stage of system development life cycle. This is a brief investigation of the system under consideration and gives a clear picture of what actually the physical system is? In practice, the initial system study involves the preparation of a system proposal which lists the Problem Definition, Objectives of the Study, and Terms of reference for Study, Constraints, Expected benefits of the new system .
- B. The System is to be developed for any user who wants to use it. We want our system user friendly and easy to use. The user also may be non-technical, so the user interface will be designed in such a way that it gets comfortable for non-technical person to operate easily.
- C. It is a partially measurement of specific technical solution and the availability of technical resorts and expertise. The analyst must find out whether the current technical resources, which are available in the system is capable of handling the customer.
- D. .Admin can view & search all the reports which employees had managed .He has right to delete, update or manage the reports, users, employee and doctors. He has

authority to view & deactivate 's accounts if they are posting any unauthorized information. He also can view user's feedbacks.

- E. One of the best uses of e-vehicle care project in, whenever customer are going on their destination but his vehicle is suddenly damaged, so they are search on the location of nearest garage through this application and they can also find the which type of facilities are provided by this garage.
- F. The minimum hardware requirement is Memory of 4 GB RAM or more, Monitor resolution of 1024*768 or highest access, Intel i3 processor, 1 GB (or more) available hard disk space.

IV. FUTURE ENHANCEMENT

- A. In future we would like to try and make system more upgraded.
- B. We would try to add more upgrade functionality as per trend.
- C. We would like to add New Category of Product.
- D. We would like to add schemes to attract more and more users.
- E. We would like to add OTP for getting forgot password.
- F. We would try to add Payment Method for Products.
- G. We would try to add Pet Adoption Online.
- H. We will provide buy/sell pet online.

V. CONCLUSION

Are you filled with sadness when you an animal that has been hit by a car? Do you take in strays and feed them because they are all skin and bones? If so you are pet lover. You would never hurt a pet. You know the importance of taking care of a pet. Taking care of your pet is a responsibility that you need to have. Pet care involves going the veterinarian, a nutritious diet, and plenty of exercise. Frist of all, it is recommended that you take your pet to the vet at least once a year. This ensures that your et has a heathy diet. From your vet you can get any kind medicines that your pet might need. Like heartworm medicines, which should be given to your pet at least once a month. You can also get vitamins for your vet, which is very essential to your dogs diet. Vitamins help in the cold winter months, which can be the hardest in your pet's joints and bones. If you notice that your pet is walking slower or is not as playful then it is recommended that you get vitamins for your pet. You can get these at you pet's office, a pet store, a department store that has a pet department such as Wal-Mart .when you first receive your pet you may need to go more than once to get all the shots for your pet.

It is very important for your pet to have their shots. Shots can be very beneficial to their health. Shots protect your pet from getting many diseases.

VI. ACKNOWLEDGMENT

We express our sincere thanks to Prof. Ajaykumar T. Shah Head of Department of Computer Engineering, Alpha College of Engineering and Technology for their Support and guidance for this project and care taken by them in helping us to complete the project work successfully.
